

College Affordability and Transparency Explanation Form Addendum

*Addendum to Summary Guides of College Costs for the
2017, 2018, & 2019 Collection Years*

March 2023

Since 2011, in an effort to improve transparency in college tuition prices for potential students and families, The Department of Education (ED) has been required to release six lists related to student costs at America's colleges and universities. Using data collected by the National Center for Education Statistics (NCES) through the Integrated Postsecondary Education Data System (IPEDS),³ each list is generated annually and released via the publicly available College Affordability and Transparency Center (CATC) website by July 1.

The following are the six annually published CATC lists:

- *Highest Tuition and Fees*: A list of the 5 percent of institutions from each sector that have the highest tuition and required fees for the most recent academic year.
- *Highest Net Price*: A list of the 5 percent of institutions from each sector that have the highest net price for the most recent academic year.
- *Lowest Tuition and Fees*: A list of the 10 percent of institutions from each sector that have the lowest tuition and required fees for the most recent academic year.
- *Lowest Net Price*: A list of the 10 percent of institutions from each sector that have the lowest net price for the most recent academic year.
- *Highest Increase in Tuition and Fees*: A list of the 5 percent of institutions from each sector that have the largest (percentage) increase in tuition and required fees, expressed as a percentage change, over the most recent three-year period.
- *Highest Increase in Net Price*: A list of the 5 percent of institutions from each sector that have the largest (percentage) increase in net price, expressed as a percentage change, over the most recent three-year period.

The Highest Increase in Tuition and Fees and Highest Increase in Net Price lists were calculated for institutions that have full-time, first-time degree/certificate-seeking undergraduate students. Each year, institutions on the Highest Increase in Tuition and Fees and Highest Increase in Net Price lists are required to provide additional information concerning college costs through the online CATEF. Institutions on both lists were required to complete a separate Collection Affordability and Transparency Explanation Form (CATEF) for each list.

According to the Higher Education Act of 1965 Sec. 132 [20 U.S.C 1015a]:

(1) IN GENERAL. — An institution shall not be placed on a list described in subparagraph (C) or (D) of subsection (c)(1), and shall not be subject to the reporting required under subsection (e), if the dollar amount of the institution's increase in tuition and fees, or net price, as applicable, is less than \$600 for the three-year period described in such subparagraph.

(2) UPDATE. — Beginning in 2014, and every three years thereafter, the Secretary shall update the dollar amount described in paragraph (1) based on annual increases in inflation, using the Consumer Price Index for each of the three most recent preceding years.

For the following CATEF Report years, 2017, 2018, 2019, the Consumer Price Index should have been raised from \$600 to \$631. Upon review, it was found that the following institutions should have been excluded from the CATEF collection because their Tuition and Fees were less than \$631. The Net Price lists were also reviewed and it was determined that none of the institutions that had completed the 2017, 2018, & 2019 CATEF collections were below the \$631 Consumer Price Index threshold. While the objective of this review was to remove institutions that did not meet the adjusted Consumer Price Index of \$631 and adjust the reported cost area responses accordingly, we found that we mischaracterized the cost areas the original reports. Below are the corrected values for Tuition and Fees and Net Price cost areas, using the original data extract files to confirm, minus the newly excluded institutions. A link to the original responses is provided below each year section.

The institutions that were required to complete both the Tuition & Fees and the Net Price survey have their own count under student charges labeled "Both". These 38 institutions should have been removed from the individual Tuition & Fees/Net Price count to avoid any duplicates counts under Control of Student Charges.

During the review of the Burden Estimates, it was found that the column labels on the 2017 CATEF report were flipped, labeling the Tuition & Fees column Net Price and vice versa. This explains the large variance between the original reported column and the amended column.

Two hundred and fifty-five institutions (46 percent) selected “yes,” indicating the estimate was accurate. The average of all responses to this question for both surveys was 3.28 hours.</p>
<p>Of the 294 institutions that responded “no,” 68 percent of responses (200 institutions) reported a number lower than the original burden estimate of 3.27 hours. The provided burden estimates ranged from 0.01 hours from a private, not-for-profit, less-than-two-year institution to 48 hours from a public, two-year institution. Of the 12 institutions that entered a burden estimate of 10 or more hours, five were from public, four-year institutions, and seven were from public, two-year institutions.</p>	<p>Of the 294 institutions that responded “no,” 68 percent of responses (200 institutions) reported a number lower than the original burden estimate of 3.27 hours.
